Title: Flight Service

Description: A flight service that clients can keep track of their flights, book flights and expected arrival. Admin will be able to track the clients information and make sure everything is running smoothly. I will set this up for one client only.

Actors: Admin, client

Functionality:

1. Client can sign up
2. Client can log in
3. Admin can check if the capacity of flight is full
4. Client can book flights
5. Admin can view clients flight schedule
6. Admin can search for client by name
7. Client can checkout/pay
8. Search flight
9. Client can undo a payed flight

Stretch Functionality:

1. Add multiple clients
2. Add multiple locations around the US
